**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species:

This application is restricted by species/subspecies as follows:

- A.    - 1. System with module configuration according to figs. 1-8;
  - 2. System with module configuration according to figs. 9-11;
  - 3. System with module configuration according to figure 15;
  - 4. System with module configuration according to figure 16; and
  - 5. System with module configuration according to figure 20.
  
- B.    - 1. System with shock absorber according to figure 12; and
  - 2. System with no shock absorber according to figure 12.
  
- C.    - 1. System with a placement of cooling racks according to page 10,  
mount on a top;
  - 2. System with a placement of cooling racks according to page 10,  
mount on a bottom; and
  - 3. System with a placement of cooling racks according to page 10,  
mount on a side.
  
- D.    - 1. System with retention means according to figure 19; and

Art Unit: 2841

- 2. System with retention means being a lever as explained in the paragraph describing in pages 11 and 12.

E. - 1. System with access port according to figure 20; and

- 2. System with no access port according to figure 20.

A proper species selection with include one item from each category. For example, species A1B1C1D1E1 refers to a system with configuration according to figures 1-8, shock absorber according to figure 12, a placement of cooling racks according to page 10, mount on a top, with retention means according to figure 19; and access port according to figure 20.

2. A telephone call was not made to attorney for applicant because the restriction requirement is complicated with multiple species. It is difficult for applicant to select species through by oral calling.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 2841

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung S. Bui whose telephone number is (571) 272-2102. The examiner can normally be reached on Monday-Friday 8:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamand Cuneo can be reached on (571) 272-1957. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
